CAA LEGAL CASE MANAGEMENT SYSTEM

Case Entry (Serving / Served) to Final Judgment, Order/Decree, Execution & Closure

Purpose
This document defines a practical end-to-end case lifecycle for the Civil Aviation Authority (CAA) Legal Case Management System. It is designed as a reference for UI/UX design, workflow logic, case intake, document management, timelines, and reporting.

1. Overall Case Flow

```
NEW CASE
↓
SERVING / SERVED
↓
SERVICE / RECEIPT DETAILS
↓
CASE REGISTRATION
↓
CASE ALLOCATION
↓
COURT & JUDICIAL DETAILS
↓
PRE-TRIAL / INITIAL STAGE
↓
HEARING / TRIAL
↓
FINAL SUBMISSIONS
↓
JUDGMENT / RULING
↓
ORDER / DECREE
↓
EXECUTION / COMPLIANCE
↓
CASE CLOSED
```

The system should treat the case as a continuous lifecycle rather than a collection of disconnected forms.

2. Example Case

Example matter: **CAA vs XYZ Aviation Ltd**

Field	Example
Case Type	Commercial
Court	High Court of Uganda – Commercial Division
Case Number	HCCS/045/2026
CAA's Position	Plaintiff / Serving Party

3. New Case – Serving Status

The administrator begins by clicking **+ New Case**. The first workflow decision should be:

Option	Meaning
CAA is Serving	CAA has initiated the matter and is serving another party.
CAA has Been Served	Another party has initiated the matter and CAA has received service.

4. Flow A – CAA Is Serving

Example: CAA initiates a commercial claim against XYZ Aviation Ltd.

Service Details

Field	Example
Serving Party	Civil Aviation Authority
Party Being Served	XYZ Aviation Ltd
Matter Type	Commercial
Date of Service	15 September 2026
Method of Service	Physical / Electronic / Court Bailiff
Person/Entity Served	XYZ Aviation Ltd
Served By	Court Bailiff
Proof of Service	Affidavit_of_Service.pdf

5. Flow B – CAA Has Been Served

Example: XYZ Aviation Ltd files a claim against CAA and CAA receives the court documents.

Field	Example
Party Serving CAA	XYZ Aviation Ltd
Party Reported / Claimant	XYZ Aviation Ltd
Date CAA Received Service	15 September 2026
Received By	Legal Department
Method Received	Court Bailiff
Response Deadline	30 September 2026
Court	High Court – Commercial Division

Field	Example
Case Number	HCCS/046/2026
Documents Received	Plaint, Summons, Annexures

6. Case Registration

After service information is captured, the system creates the core case record.

Field	Example
Case Number	HCCS/045/2026
Case Title	CAA vs XYZ Aviation Ltd
Case Type	Commercial
Court	High Court of Uganda – Commercial Division
Jurisdiction	Uganda
Date Filed	10 September 2026
Date Served	15 September 2026
Current Status	Active
Current Stage	Pre-Trial

The system should automatically generate a unique Case ID.

7. Parties

Party 1: Civil Aviation Authority — Plaintiff

Party 2: XYZ Aviation Ltd — Defendant

The system should support additional parties where necessary, including co-defendants, respondents, interested parties, or other relevant entities.

8. Legal Team Allocation

Role	Example
Case Officer	Michael Okello
CAA Lawyer	Counsel Sarah Namukasa
Law Firm / External Counsel	ABC Advocates
Lead External Lawyer	David Kato

9. Court & Judicial Details

Field	Example
Court	High Court – Commercial Division
Case Number	HCCS/045/2026
Judicial Officer	Hon. Justice A. N. Example
Level	High Court
Division	Commercial

Field	Example
First Mention	05 October 2026
Next Court Date	05 October 2026

Matter Stage Options

```
Filed → Served → Pre-Trial → Hearing → Final Submissions → Judgment → Order/Decree → Execution → Closed
```

10. Matter Progress & Case Timeline

The case should have a chronological timeline where every major action is recorded with a date, event, responsible person, description, documents and next action.

Date	Event	Example
10 Sep 2026	Case Filed	CAA filed commercial claim.
15 Sep 2026	Defendant Served	XYZ Aviation Ltd served.
30 Sep 2026	Defence Filed	Defendant filed written statement of defence.
05 Oct 2026	First Mention	Court gave directions.
20 Oct 2026	Scheduling Conference	Issues identified.
15 Nov 2026	Hearing	Plaintiff witness testified.
22 Nov 2026	Hearing	Defendant witness testified.
10 Dec 2026	Final Submissions	CAA filed submissions.
17 Dec 2026	Defendant Submissions	Defendant filed submissions.
15 Jan 2027	Judgment	Judgment delivered.

11. Document Management by Stage

Documents should be attached to the stage or event where they belong, rather than being placed in one undifferentiated folder.

Stage	Example Documents
Case Filing	Plaint.pdf; Statement of Claim.pdf; Annexure A.pdf
Service	Summons.pdf; Affidavit of Service.pdf; Proof of Service.pdf
Defence	Written Statement of Defence.pdf; Defence Annexures.pdf
Hearing	Witness Statement – PW1.pdf; Exhibit A.pdf; Court Proceedings.pdf
Final Submissions	CAA Submissions.pdf; Defendant Submissions.pdf
Judgment	Judgment.pdf; Extracted Order.pdf

12. Witness Management

For each witness, the system should track witness name, party, witness number, role, statement, scheduled date, testimony date, cross-examination, exhibits/documents and remarks.

Witness	Example
PW1	John Mugisha – CAA Director of Operations; testified 15 Nov 2026

Witness	Example
PW2	Sarah Namukasa – CAA Legal Officer; pending

13. Adjournment Flow

Example: a hearing scheduled for 15 November 2026 is adjourned at the request of the defendant's counsel.

Field	Example
Previous Date	15 Nov 2026
Reason	Defendant counsel requested adjournment.
Court Decision	Adjourned.
Next Date	22 Nov 2026
Stage	Hearing

The timeline should preserve both events: the original hearing date and the adjournment/new date.

14. Final Submissions

Submission	Example
CAA Submission	Filed by CAA / ABC Advocates on 10 December 2026 — CAA Final Submissions.pdf
Defendant Submission	Filed by XYZ Aviation Ltd on 17 December 2026 — Defendant Submissions.pdf

15. Judgment / Ruling

When the judicial officer delivers judgment, the system should create a permanent judgment event without overwriting earlier case history.

Field	Example
Judgment Date	15 January 2027
Judicial Officer	Hon. Justice A. N. Example
Outcome	Judgment delivered
Judgment Document	Judgment.pdf
Judgment Summary	Court determined the commercial claim.
Orders	See extracted order.
Appeal Filed?	No

Example timeline card: **15 JAN 2027 — JUDGMENT DELIVERED**
Judicial Officer: Hon. Justice A. N. Example
Document: Judgment.pdf
Status: Judgment Delivered

16. Order / Decree

Judgment and the resulting order/decree should be treated as separate workflow stages.

Field	Example
Order/Decree Date	20 January 2027
Type	Court Order

Field	Example
Amount	UGX 250,000,000
Responsible Party	XYZ Aviation Ltd
Compliance Deadline	20 February 2027
Document	Extracted Order.pdf

17. Execution / Compliance

If the responsible party does not fully comply with the order, the case progresses to execution/compliance tracking.

Field	Example
Order Amount	UGX 250,000,000
Amount Recovered	UGX 100,000,000
Outstanding	UGX 150,000,000
Execution Method	Court Bailiff
Execution Status	Partially Executed

Example execution timeline: 20 Feb 2027 — compliance deadline missed; 05 Mar 2027 — recovery process initiated; 20 Mar 2027 — UGX 100M recovered; 30 Apr 2027 — remaining balance pursued.

18. Case Closure

Field	Example
Case Status	Closed
Closure Date	30 May 2027
Closure Reason	Order fully complied with.
Final Outcome	Case concluded.
Outstanding Amount	UGX 0
Closed By	CAA Legal Administrator

After closure, the case should be locked from ordinary editing while authorized users can continue to view the complete history and audit trail.

19. Final Case Overview Page

CAA vs XYZ Aviation Ltd
HCCS/045/2026
Commercial • High Court • Active

Lifecycle indicators:
SERVING ✓ FILED ✓ SERVED ✓ PRE-TRIAL ✓ HEARING ✓ SUBMISSIONS ✓ JUDGMENT ✓ ORDER ✓ EXECUTION ●

Recommended tabs: **Overview | Timeline | Parties | Lawyers | Hearings | Witnesses | Documents | Judgment | Execution | Chat**

20. Recommended Workflow Logic

The system should be **event-driven rather than only form-driven**. Instead of storing only a value such as “Current Status: Hearing,” each case action should record what happened, when it happened, who recorded it, what document supports it, and what happens next.

Core lifecycle:
CAA Served/Serving → Filing → Service → Defence → Mention → Directions → Scheduling → Hearing → Witnesses → Evidence → Submissions → Judgment → Order/Decree → Execution → Compliance → Closure.

21. Practical System Requirements

Requirement	System Behaviour
Role-based access	Different dashboards and permissions by role; only authorized users create or edit relevant case information.
New Case control	New Case should be available to the CAA Legal Administrator/Admin according to the configured permissions.
Serving / Served branching	Selecting CAA is Serving or CAA has Been Served changes the next intake fields.
Timeline	Every significant case event is timestamped and retained.
Stage-specific documents	Documents are attached to filing, service, defence, hearing, submissions, judgment, order or execution events.
Audit trail	Record user, date/time, action and changes for accountability.
Case history	Past stages remain visible; new events do not erase previous events.
Judgment separation	Judgment, order/decree and execution are distinct stages.
Closure	Closed cases remain searchable/viewable to authorized users, with editing restricted.

22. One Complete Example in One Line

CAA serves XYZ Aviation Ltd → case filed and registered → XYZ files defence → first mention → scheduling conference → hearings and witnesses → final submissions → judgment delivered → order/decree issued → compliance monitored → execution if necessary → full compliance → case closed.

Document purpose: **Workflow and UI/UX reference for the CAA Legal Case Management System.**
